anytime, anywhere . . .

Enterprise Mobility

Enterprise Mobility

SenzIT

One Solution & One App
for One World

Today's enterprises are under tremendous pressure to keep pace with a rapidly changing marketplace, the "Every-thingization" and "Appi-fication" that is rapidly changing the way enterprises does business and while supporting employees, customers, and consumers who are using an entirely new set of capabilities to meet their needs.

Senzit's Enterprise Mobility Service provides the capabilities you need, to achieve high performing highly responsive and "Always On" business operations to unlock and deliver the Business Value, across all the channels of user interactions.

- IBM Worklight along with WebSphere Application Server
- Cloud Service
- IBM Big Data Platform
- IBM Watson

You can develop rich, cross-platform apps without the use of code translation, proprietary interpreters or unpopular scripting languages, while improving the time to market, reducing cost and complexity of development and delivering a contextual and personalized "WOW" user experience, across a variety of mobile devices using IBM Worklight. IBM Worklight when used with the IBM WebSphere Application Server, offers options for a faster, more flexible Java application server runtime environment.

You can make use of different types of Cloud Computing services commonly referred to as Software as a Service (SaaS), Platform as a Service (PaaS) and Infrastructure as a Service (IaaS), without a large capital investment or compromising security, reliability or performance. Based on the business need, a combination of Private, Public and Hybrid cloud could be leveraged to deliver the right experience.

You can have a platform that blends technologies that are well suited for structured, repeatable tasks together with complementary newer technologies that address speed and flexibility and are ideal for adhoc data exploration, discovery and analysis of both structured and unstructured data.

You can transform how organizations think, act, and operate in the future with the help of Cognitive systems like Watson. Learning through interactions, they deliver evidence based responses driving better outcomes, improving the quality of life and making this world a better & fun place to live.
